Bangladesh University of Textiles

Department of Fabric Engineering

FE 254-0723: Fabric Manufacturing (Practical)

Department: _____ Date: _____

Name: _____

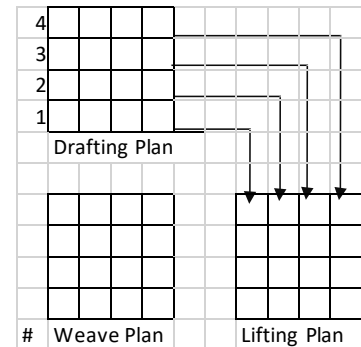

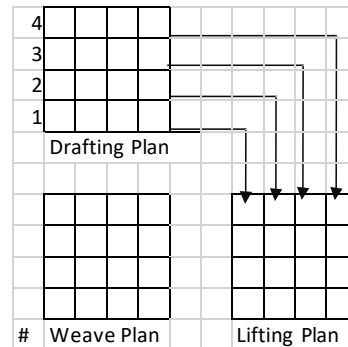

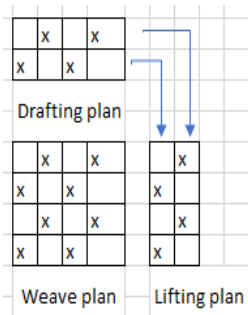

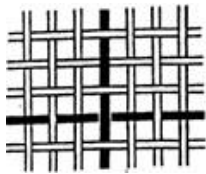

ID: _____

Exp. No: 06 Name of the Experiment: Study on the Negative Tappet Shedding Mechanism.

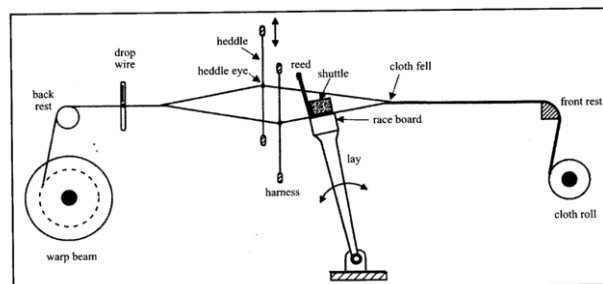

Sign: _____

Key words: shed, Warp, Weft, Weave Plan, Drafting Plan, Lifting Plan, repeat size, gearing diagram, crank shaft, bottom shaft, Tappet shaft, auxiliary shaft, counter shaft, , loom cycle, tappet, top roller mounting, spring/dead weight, positive tappet, negative tappet.

1. Fabric, Weave plan, Drafting Plan, Lifting Plan

2. Draw the yarn to fabric path of a loom and identify different parts.

3. Sketch Tappet Shedding Mechanism and identify various parts.

4. Draw a gearing diagram of a conventional loom according to real machine and identify various Parts.
